Have you always been interested in Digital Media and were excited about everything related to the topic programming? We are currently looking for a working student to support our Product Management Team in their "Daily Business" - the optimal presentation of our technological complex products in a customer-friendly way on our website and in our webshop.

## Working Student (m/w/d) Content Management & Webshop

### Your responsibilities

- Administration of a product specification database in our ERP system and the interfaces to offers/orders (ERP), webpage (HTML), catalogues/brochures (InDesign), data sheets (PDF) and webshops (Magento) via easy-to-use scripts/macros
- Administration and maintenance of our webshop back & frontends
- Independent communication with the relevant departments/responsible persons to define the required contents and structures
- Support of product management in operative & strategic day-to-day business
- Support of the marketing team regarding webpage & webshop

### Your skills

- Currently enrolled in studies, no matter which major
- Good programming skills in PHP, Python, SQL as well as knowledge of HTML, CSS and JavaScript are an advantage
- Excellent knowledge of MS Excel incl. VBA/Makro-Scripting
- Good German and English language skills
- Independent and well-structured working style

### Our Offer

- An exciting job which can be easily adapted to your class schedule
- A broad spectrum of diverse tasks and a very good salary
- The opportunity to bring in your own ideas and take on smaller projects independently
- A great working atmosphere in our office in our new building in Haar (directly at the S-Bahn station)

You would like to gain a practical insight into the Product Management department of a medium-sized, fast-growing company and could manage to work 12-20 hours per week during the semester?

If so, we look forward to receiving your application by using our [Online Application Form](#).
