Explore. Discover. Innovate.

Are you interested in business topics such as product life cycles, market and competitive analyses as well as in the (further) development of high-tech products? Then this working student job might be just right for you. We are looking for a Working Student to support our Product Management Department for 10-20 hours per week.

## Working Student Product Management

After an individually designed training period you will support our product managers in the following tasks.

### Your responsibilities

- Implementation of market and competitive analyses plus requirements acquisition for nanopositioners and sensors
- Support in the further development of the product and service portfolio as well as planning and assisting in the implementation of strategy workshops
- Preparation of presentations for product strategy and strategic portfolio planning, cost analysis and further development of a pricing strategy
- Assistance in the implementation and planning of marketing activities
- Interdepartmental information acquisition and coordination

### Your skills

- Enrolled student in engineering sciences (mechanical engineering, electrical engineering, etc.) or industrial engineering with a technical focus, at least 3rd semester bachelor's degree
- Good MS Office skills as well as fluent in German and English
- An independent, structured way of working and an ability to think abstractly and strategically
- Motivation and interdisciplinary approach

### Our offer

- A well-paid working student job with flexible working hours that can be adapted to your lecture schedule
- A diversified workday in which you have the opportunity to get to know the product management department and also various other departments (R&D, Sales, Marketing) of a fast-growing, medium-sized company
- An open corporate culture and short decision-making paths in an international and dynamic team at our new location directly at the S-Bahn station Haar in the east of Munich.

Would you like to experience what it means to work in the product management of a fast-growing company?

Then we are looking forward to receiving your application via our [Online-Application-Form](#).
