

Join attocube

Explore. Discover. Innovate.

The mission of attocube's microscopy and cryogenics department to create scientific impact has kept attocube at the frontier of cutting edge research instrumentation. We are searching for a dynamic and motivated Project Leader to run high-tech customer projects in the field of scientific instrumentation systems for nanotechnology applications. Your customers are high profile users in public or private R&D institutions, as well as high-tech industries spread all over the world.

Project Leader Cryogenic Instruments

Responsibilities and Duties

- Project leader for customer projects in attocube systems' microscopy/cryogenics department
- Range of projects is scanning probe microscopy and cryogenic instrumentation; often combinations and customizations thereof
- Supervision and implementation of projects from the early stage (system layout and documentation, control of procurement and production) till the testing period, delivery and final installation in customers' labs
- Participation in the improvement of microscopy and cryogenic products
- Customer support including test measurements on customers' appliances

Skills and Qualifications

- Completion of a university degree or engineering diploma (in physics, material science, optics, mechanical/electrical engineering, mechatronics or microsystems or similar)
- Expert experience working with scanning probe microscopes and/or cryogenics
- Experience or strong interest in project management
- Strong communication skills - English is mandatory, German will be highly desired
- Pioneering spirit capable of coming up with technically excellent, yet efficient solutions
- Team-player, motivated, committed, flexible, open-minded personality

What We Offer

- A technologically demanding and innovative high-tech environment
- A permanent position with attractive social benefits such as a pension allowance and a performance-based bonus, an in-house gym as well as numerous team events
- Challenging tasks, the opportunity to contribute and implement your own ideas and a very good working atmosphere at our new location in Haar near Munich
- Flexible working hours and flat hierarchies in a quickly growing, professional team

Are you interested in innovative technologies and creative in putting your ideas into reality?

Then we look forward to receiving your application via our [Online Application Tool](#).
