Explore. Discover. Innovate.

Would you like to gain your first or further experience in purchasing? Do you know terms such as quality, cost efficiency and optimal logistics processes from theory and perhaps even from practice? We are looking for a working student to support our four-member purchasing team in the day-to-day business at our new location in Haar near Munich- the timely supply of production goods under cost-efficient aspects and in corresponding quality.

## Working Student Purchasing

### Your responsibilities

- Search for potential new suppliers including the preparation and execution of inquiries and offer comparisons
- Development of a supplier database as well as revision and maintenance of material and supplier data in our ERP system
- Preparation and support in price negotiations as well as assisting our purchasers in operational and dispositive tasks
- Further development of purchasing processes and, if interested, handling of small projects
- Data analysis in various subject areas, e.g. supplier management

### Your skills

- Ongoing studies in the field of economics or comparable subject area
- Confident handling of MS-Office, in particular Excel
- Strong communication skills and a good command of spoken and written English
- Motivation as well as an independent, structured and careful way of working

### Our offer

- A well-paid and exciting working student job with flexible working hours (10-20 h per week) that can be easily adapted to your class schedule
- A diversified working day in which you will have the opportunity to take on responsibility for your own tasks
- An open corporate culture with short decision-making paths in an international and dynamic team at our new location directly at the S-Bahn station Haar in the east of Munich

You would like to experience what it means to work in the purchasing department of a fast-growing company and would like to work independently from the start?

If so, we look forward to receiving your application by using our [Online-Application Form](#).
