Explore. Discover. Innovate.

Would you like to actively shape our ERP landscape by contributing your digital DNA to our system architecture and business processes? As Application Manager for ERP & Core Applications you will advise our departments and management board with your ideas concerning the optimal design of business processes and system functions within our ERP system. In collaboration with a highly motivated team, you will evaluate new system functions and actively drive development projects toward successful implementation.

## Application Manager for ERP and Core Applications

### Your Responsibilities and Duties

- Support and further development of our ERP system
- Advise our departments and management board concerning the optimal design of business processes within the ERP system
- Coordinate and manage external service providers during the implementation of system expansions based on departmental requirements
- Support users and conduct relevant trainings
- Program & modify standard reports for the day-to-day business of internal company users
- Manage projects and introduce further core applications, e.g. DMS and their networking with the ERP system

### Your Skills and Qualifications

- Completed studies in computer science, business informatics or a completed IT training with corresponding professional experience
- Very good knowledge in dealing with ERP systems as well as MS-SQL servers and databases
- IT programming skills and experience with BI reporting tools are a plus
- Ideally several years of project experience and a good understanding of business processes
- A hands-on mentality as well as a pragmatic, solution-oriented and independent way of working
- High interest in learning new programming languages and innovative technologies

### What We Offer

- Full contract with social benefits such as pension allowance and a performance-based bonus
- Flexible working hours, a subsidized canteen, numerous team events and a diverse health and sports program (e.g. in-house fitness studio, free fruit)
- A dynamic and challenging field where you have the opportunity to contribute and implement your own ideas
- A positive working atmosphere in an international, innovative team at our new site in Haar near Munich, directly located at the S-Bahn station Haar

Would you like to use all your project experience to develop and implement new ideas and concepts? Then we look forward to receiving your application through [Online Application Tool](#).
