Explore. Discover. Innovate.

Would you like to be part of the development of nanoprecise positioning systems and sensor solutions exceeding by far the precision of previously available technologies of this kind? Do you like to carry out international customer-specific development projects? We are currently looking for a Development Engineer to support our R&D department at our NanoFactory in Haar.

Development Engineer Motion & Sensing

Your Responsibilities and Duties

- Construction, design and development of new positioning and sensor systems under consideration of quality, time and cost targets
- Supervision of projects for customer-specific positioning systems in research and industry:
 - Communication and cooperation with customers on a high technical level
 - Creation of design concepts according to customer requirements, both for individual positioning and sensor solutions as well as for integrated systems
 - Elaboration of 3D designs by using CAD
 - Accompanying the complete product development process from the first product idea until the final series production by using appropriate project management tools and processes to ensure the quality and efficiency of the development process
- Search, analysis, evaluation and implementation of optimization measures in the area of standard production

Your Skills and Qualifications

- A completed master's degree in physics, physical engineering, materials science, mechatronics, microsystems technology or similar
- Profound knowledge in mechanical engineering, CAD experience with SolidWorks or similar programs, FEM knowledge and practical work experience are advantageous
- High interest in innovative technologies and enthusiasm for the development of new products
- Very good knowledge of German and English combined with strong analytical and conceptual skills as well as an independent working style

What We Do Offer

- A technologically challenging and innovative high-tech environment with various development opportunities
- Flexible working hours, flat hierarchies in an international team as well as a wide range of health and sports activities (e.g. in-house fitness studio, health days, free fruit)
- A very good working atmosphere at our new location in Haar near Munich, directly located at the S-Bahn station Haar
- A permanent position with attractive social benefits such as a pension allowance and a performance-based bonus as well as numerous team events

You want to take responsibility right from the start and are interested in a diverse and challenging field of work? Then we are looking forward to receiving your application by using our [Online Application Form](#).
